SUMMARY

Creative graphics designer and UI/UX enthusiast dedicated to crafting intuitive, visually engaging digital experiences. Experienced in brand conceptualization, interface prototyping, and applying human-centered design philosophies to practical platforms. Eager to bring a unique blend of aesthetic design and technical problem-solving to a collaborative graphic design team.

PROJECTS

PrintPress | Full-Stack Web Application

- Developed a full-stack printing management platform using HTML, CSS, PHP, and MySQL to eliminate on-site queues and streamline printing requests.
- Implemented role-based access control featuring distinct portals for Students, Staff, and Administrators.
- Engineered student features for submitting print files, selecting print types, and choosing locations with predetermined pricing.
- Built a staff dashboard for processing orders, updating statuses ("Processing" or "Completed"), and managing inventory.
- Created an admin portal with full CRUD (Create, Read, Update, Delete) functionality to manage user accounts, inventory, and printing stations.
- Designed the user interface with a core philosophy of minimizing friction, prioritizing simplicity, and maximizing functional efficiency.

Project addLib | Browser Extension Prototype

- Designed a conceptual web browser extension to assist users in creating references and verifying sources using research metadata.
- Focused the UI/UX design on reducing button clutter and creating a visually simple, intuitive user experience.

Project REQUIEM | Brand Concept

- Collaborated to conceptualize and develop a comprehensive brand identity and design portfolio.

Gym Check-in Application | Web Development

- Built a localized web-based application to manage client check-ins for a local gym.
- Utilized HTML, CSS, JavaScript, and SQLite to create a functional, database-driven frontend and backend solution.

SKILLS

Technical Languages & Frameworks: Java, C, C++, C#, PHP, Spring Boot, HTML, CSS

Database & Tools: MySQL, SQLite, Git, Linux

Core Competencies: UI/UX Design, Data Analysis, Project Management, Problem-Solving, Adaptability, Collaboration

EDUCATION

Cebu Institute Of Technology - University, Cebu

BS in Computer Science | Expected Graduation: May 2028

Focus on Software development and UI/UX Design

AWARDS

Most Unique Research Paper - St. Catherine's College
